

27 mountaineers missing after avalanche in Uttarkashi

DEHRADUN/UTTARKASHI, Oct 5:

Twenty-seven mountaineers remained missing on Wednesday after rescue workers brought 14 injured members of their team to safety, a day after an avalanche claimed 10 lives in Uttarkashi.

The Uttarakhand Police said on Facebook that 10 bodies have been retrieved so far as a multi-agency search and rescue operation aided by IAF helicopters continued through the day to find those missing.

Chief Minister Pushkar Singh Dhami did an aerial inspection of the area, which is at a height of 17,000 feet, that was hit by the avalanche on Tuesday and told reporters that 27 climbers are still missing.

He said he prayed for their safety even as personnel of the State Disaster Response Force (SDRF), National Disaster Response Force (NDRF), Indo-Tibetan Border Police (ITBP) and mountaineers from the Nehru Institute Of Mountaineering (NIM) are trying to find the missing climbers. "Out of 34, 27 are still missing," Dhami told reporters after the aerial survey along with Haridwar MP and former Union Minister Ramesh Pokhriyal 'Nishank'.

Meanwhile, 14 injured mountaineers were airlifted to the ITBP camp at Matli out of which five were admitted to district hospital Uttarkashi and nine who had sustained minor injuries were sent back to the NIM, the Uttarakhand Police said on the social media.

However, it is still not clear whether the 14 injured mountaineers rescued on Wednesday were part of the 41-member team that had gone to summit the Draupadi ka Danda-II peak or waiting at the NIM basecamp.

According to the NIM, the

team which was caught in the avalanche consisted of 34 trainee mountaineers and seven instructors only.

Earlier in the day, the Uttarakhand Police released a list of 28 trainee mountaineers who were missing in the avalanche at the height of 17,000 feet.

Sub Divisional Magistrate, Bhatwari, Chhattar Singh Chauhan said 14 members of the team out of which six had sustained minor injuries in the avalanche were airlifted to Matli in two sorties.

Eight more rescued in another sortie are alright, he said, adding they are being sent back to the NIM.

Out of the 14 rescued so far, 10 are trainees and four instructors, he said, adding the NDRF, SDRF, ITBP and NIM are jointly conducting the search and rescue operations.

A search is on to find the rest of the 41-member team of mountaineers who have been missing since the avalanche occurred at 8.45 am on Tuesday. The missing are said to be stuck in the crevasse in Dokriani Bamak glacier where the avalanche struck.

The trainees hail from West Bengal, Delhi, Telangana, Tamil Nadu, Karnataka, Assam, Haryana, Gujarat, Himachal Pradesh, Uttarakhand and Uttar Pradesh.

The bodies recovered include that of mountaineer Savita Kanswal who had climbed the Everest in May this year. She was from Lonthru village in Uttarkashi district.

Search and rescue operations resumed on Wednesday morning with four ITBP jawans dispatched in Cheetah and ALH helicopters to Dokriani Glacier.

The rescue operations had to be halted due to darkness and inclement weather on Tuesday. (PTI)

5G users to get upto 600 mbps speed during launch phase

NEW DELHI, Oct 5:

Mobile subscribers will get up to 600 megabit per second speed in 5G network during the launch phase and handsets are expected to work at par with professional computers for accessing apps and data processing, according to industry players.

Reliance Jio has started providing 5G services to select customers in parts of four cities -- Delhi, Mumbai, Kolkata and Varanasi -- and Bharti Airtel in parts of eight cities -- Delhi, Mumbai, Varanasi, Bengaluru, Chennai, Hyderabad, Nagpur and Siliguri -- to all customers with 5G handsets.

Subscribers of both the companies will not require to replace existing sim for availing 5G services.

Jio has said that its customers will continue to avail 5G services under "Beta trial" until the network coverage of a city is substantially complete.

The company has promised access to unlimited 5G data with speed of up to 1 gigabit per second (GBPS). Industry players are of the opinion that this level of speed will be available very close to mobile stations.

"5G is expected to deliver up to 600 mbps (megabit per second) during the launch phase because traffic on the network will be low. However, it will continue to remain in the range of 200-300 mbps after full roll out," Ericsson head of network solutions, strategic network evolution, South east Asia, Oceania and India, ThiwSeng Ng told PTI.

This means a two-hour high definition movie which is generally around 6 GB file size can be downloaded in 1 minute 25 seconds and a 4K movie in about 3 minutes at a top speed of 600 mbps.

Customers buying 5G handsets or having a 5G-enabled handsets will see 5G option in their network setting and they will need to select it for availing the service.

Delhi Govt receives 2,000 complaints against parked old vehicles

NEW DELHI, Oct 5:

The Delhi Government has received nearly 2,000 complaints from the city's resident welfare and market associations about old vehicles parked in their premises within two days of issuing a Whatsapp number for the purpose.

The Delhi transport department had issued the number 8376050050 for RWAs and market associations to share details about parked old vehicles.

"Within two days of issuing the number, we received 2,000 complaints from across Delhi. However, the complaints need to be verified. People are sending pictures of vehicles that they feel look old. We have to verify the

on their device will start showing 5G instead of 4G when 5G will be available in their locality.

Former BSNL chairman and managing director Anupam Shrivastava said that telecom operators are expected to provide free 5G service till the time of roll out and give them a taste of the new service.

"Once the roll out is over in a circle, telecom operators may announce their tariff plan and charge a premium for 5G over 4G," Shrivastava said.

Nokia senior vice president and head of India market Sanjay Malik said that the high speed in 5G will double average data consumption per subscriber in India in one and half years.

He said that the tariff for 5G services varies from country to country.

"There are some countries who are not charging separately for 5G and there are some who are charging a premium. The model for India will evolve based on the business case here," Malik said.

The roll out of 5G is expected to drive down the cost of smartphones in India as well as make them work at par with workstations (professional computers).

Qualcomm president and CEO Cristiano Amon said the launch of 5G technology in India will also help bring 5G devices across all different price points. "When we look at the opportunities with 5G development in India, I see multiple and very important opportunities. They can all happen at the same time. The first one is India scale will bring in 5G technology into every single device at all different price points," he said.

"5G will democratise computing power. If you have a 5G device, whether it's a phone or a computer, you want to run an application that requires a lot of computing power. 5G will provide that connection to the cloud (computers) that allows you to tap on demand the computation of the cloud as if both were the same computer," Amon said. (PTI)

details of the vehicles' registration in our database to ascertain whether they are actually overage and unfit for plying on Delhi's roads," a senior official said.

There are around 25 lakh such vehicles in the national capital, he added. "If we find the vehicles unfit to be parked in public places, our teams will be dispatched, and they will impound the vehicles and immediately hand them to the authorised scrapper for scrapping," the official said.

In 2018, the Supreme Court had ordered that plying of diesel and petrol vehicles older than 10 years and 15 years respectively is banned in Delhi. It had added that the vehicles violating the order would be impounded. (PTI)
