

**'Capital expenditure increases 5 times'
Infra development driving force of
economy, needs to move in top gear: PM**

NEW DELHI, Mar 4:

Prime Minister Narendra Modi on Saturday said that India's infrastructure development which is the driving force of the economy needs to move in "top gear" to help the country become a developed nation by 2047.

Addressing a post-budget webinar, Modi said that by focussing on infrastructure development, which is the driving force of the economy, India will achieve the target of becoming a developed nation by 2047.

"Infrastructure development is the driving force of the country's economy... Now we have to improve our speed and move in top gear," he said while recalling the initiatives taken by his

Government to improve the health of the country's infrastructure.

The subject of the webinar was 'Infrastructure and Investment: Improving logistic efficiency with PM GatiShakti National Master Plan'. Modi is holding a series of webinar to

dele upon various aspects of the Union Budget 2023-24 presented by finance minister Nirmala Sitharaman in the Lok Sabha on February 1.

He said that the latest Budget will give new energy to infrastructure. He said India's capital expenditure or capex has increased five times compared to 2013-14 and the government is moving with a target of investing Rs 110 lakh crore under the National Infrastructure Pipeline.

"This is a time of new

responsibilities, new possibilities and bold decisions for every stakeholder," he emphasised. The Prime Minister told the gathering that his Government is working to create modern infrastructure in all areas such as roads, railways, ports and airports. It would help in enhancing competitiveness of businesses and reduce logistics cost.(PTI)
